

ModernISE Platform

Cloud-delivered ISE as a Service — All the ISE goodness. None of the InfraOps - a single-tenant secure enclave in your chosen geographies, orchestrated and operated end-to-end. Deploy new or migrate existing; bring your own ISE licenses (BYOL). No infrastructure project, no specialized hires, no upgrade weekends.

ARCHITECTURE & OPERATIONS

- **Dedicated secure enclave** — single-tenant IaaS per customer — never shared — deployed in your choice of 35+ regions with flexible secure backhaul (IPSec VPN, interconnects) to your sites.
- **Zero-downtime lifecycle** — automatic upgrades, patches, certificates & backups with continuous ISE health assessments.
- **Full admin access** — it's still real Cisco ISE — your team keeps TACACS+ & RADIUS policy control and pxGrid, integrations.
- **API-first & AI-ready** — orchestrate enclaves, deployments & interconnects programmatically.
- **Predictable OpEx** — a 1 or 3-year subscription replaces staffing risk, tooling, and upgrade projects — 20–40% lower TCO.
